Biography:

ATOMWINTER is an old school death metal band that was founded in Göttingen in 2010. Live, listeners are treated to the repertoire of four albums with a heaviness that is second to none. With an extreme guitar sound, which is transported by only one guitarist in an inimitable way, the band quickly gained a good reputation in the German underground scene. Work on the fifth album has already begun, and it remains to be seen what ATOMWINTER will produce this time to challenge the listener's ears.
